Summary — Full Stack Developer with 2.5+ years of experience in designing and developing enterprise-grade backend and full-stack applications. Experienced in building scalable REST APIs, core business workflows, and analytics dashboards using Java, Spring Boot, Microservices, React, MongoDB, and SQL.

Skills

Backend	Java, Spring Boot, Microservices, REST APIs, Spring Security, JWT, JUnit	**Database**	MySQL, MongoDB
Frontend	React.js, JavaScript, HTML5, CSS3, React Hooks, Redux, Jest, React Testing Library (RTL)	**Cloud/DevOps**	Google Cloud Platform (GCP), Docker, Kubernetes
		Tools	Git, GitHub, Postman, IntelliJ IDEA, VS Code
		Methodologies	Agile Scrum

Experience

Persistent Systems Limited   **Sept 2023 – present**
Software Engineer

Client:IDFC First bank

– Developed and maintained Spring Boot microservices for customer onboarding, KYC validation, collateral assessment, and loan lifecycle workflows.
– Integrated third-party APIs (NSDL, Bureau, GST, fraud detection) for automated customer verification.
– Developed React.js dashboards with multistep forms, document uploads, and review modules for RMs, CMs, and Ops teams.
– Implemented RBAC using Spring Security + JWT, restricting module access based on user roles.
– Designed analytics dashboards with interactive charts to track approval rates, sanction vs collateral ratios, and disbursement trends.
– Leveraged GitHub Copilot and AI-powered tools for faster API development, unit test generation, and bug resolution, improving delivery timelines.
– Worked with relational databases (MySQL/PostgreSQL), optimizing queries for high-volume transactions.
– Collaborated in an Agile environment, participating in sprint planning, daily stand-ups, and retrospectives.

Persistent Systems Limited   **Jan 2023 – Jun 2023**
Intern

– Trained in core Java, Spring Boot, REST APIs, and Database Management Systems.
– Learned frontend technologies: HTML5, CSS3, JavaScript.
– Hands-on with Git/GitHub and Agile (Scrum ceremonies, user stories, sprints).
– Implemented a mini Spring Boot + React project as part of the internship evaluation.

Nagarro   **Jun 2022 – Aug 2022**
Intern

– Trained in full-stack web development with a focus on React.js and JavaScript.
– UI projects prepared and deployed with state management and routing.
– Completed assignments with clean code, Git version control, and modern UI/UX practices.

Education

Acropolis Institute Of Technology And Research, Indore
Bachelor of Technology in Information Technology

Certifications

– Google Professional Cloud Architect - May 2024
– Google Associate Cloud Engineer - Dec 2023

Projects

Gadget Gizmo, an E-commerce project   **Ongoing Personal Project**
– Designed and developed Spring Boot REST APIs integrated with MongoDB and GCP Cloud Storage.
– Built React.js frontend with JWT-based authentication and secure role management.
– Applied Test-Driven Development (JUnit) to ensure code quality.
– Automated CI/CD pipelines with Jenkins, deploying containers on GKE.
